

Use the Image-Resizer App to interact with blobs in Azure Portal

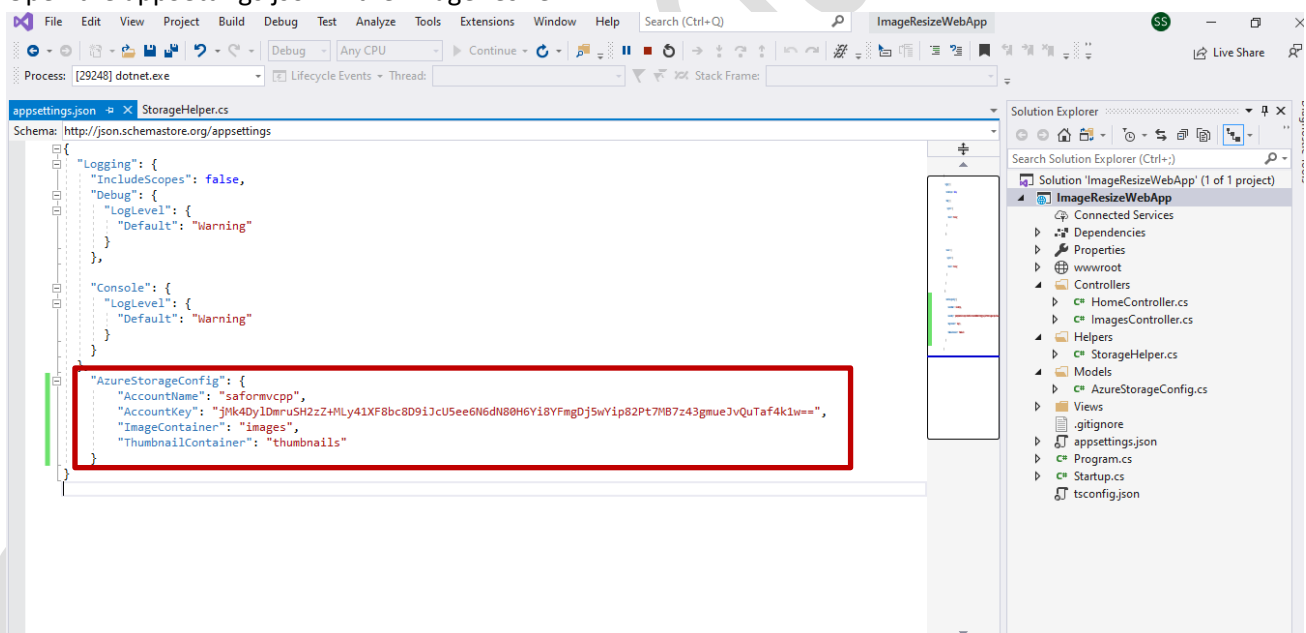

1. Create a storage account by name "sformvcapp"
2. Create 2 blob containers "images", "thumbnails" as shown in the screenshot below.

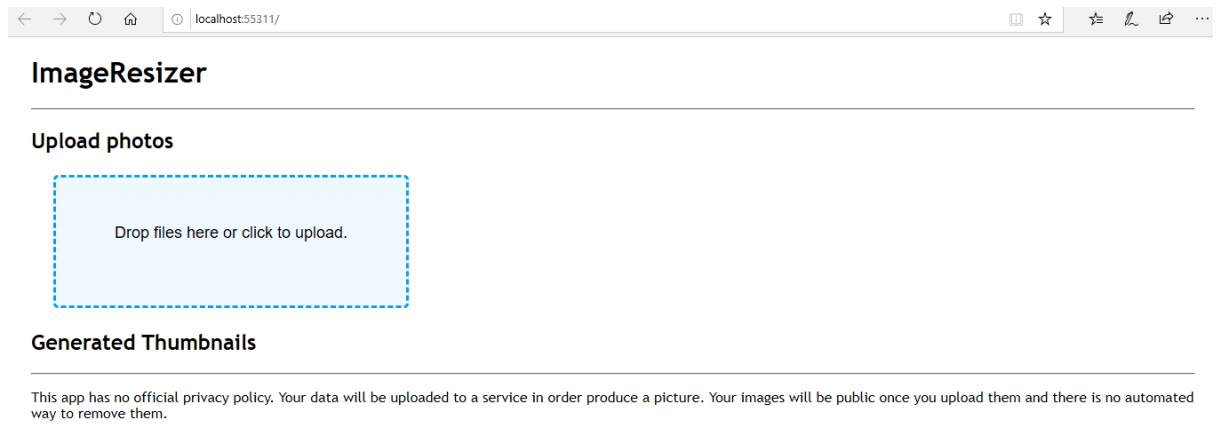

- 3.
4. To get the storage account name, access keys, click "Access Keys" option as highlighted in above screenshot. The screen that will appear will be as shown below.

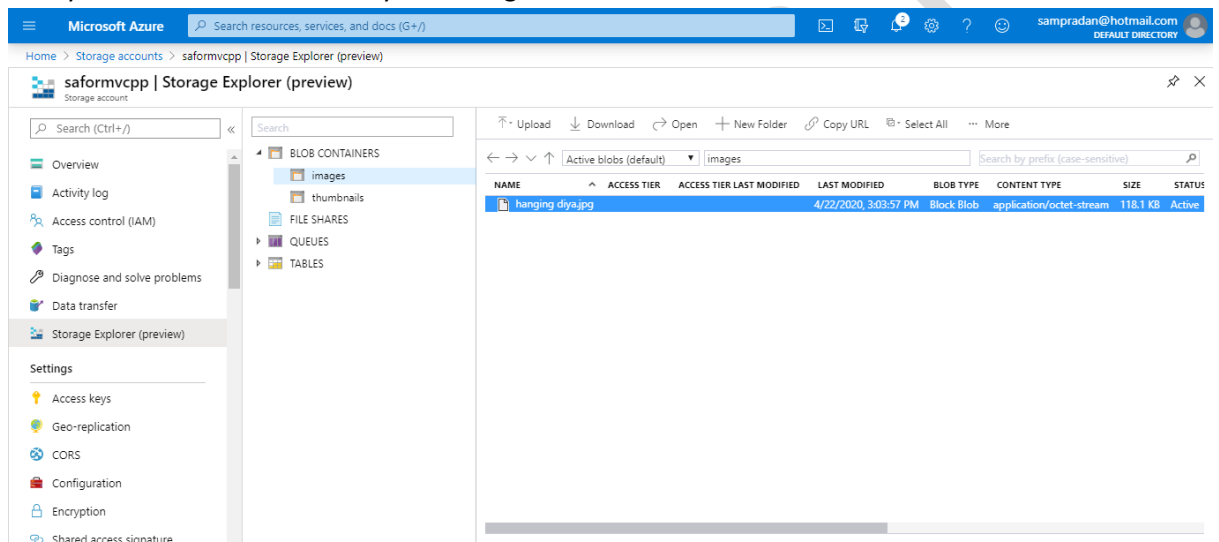

- 5.
6. Copy the Storage Account Name, Key as highlighted above, in a notepad. We will use this in the ImageResizer App's appSettings.json
7. Open the appSettings.json in the ImageResizer

- 8.
9. Paste the Account Name, Key saved in step 6, and paste it in the highlighted location.
10. Now you can execute the application.
11. Drop a file as shown below,

- 12.
13. Verify that the file has reached your storage account's blob container.

- 14.
15. This completes the using storage APIs with blobs.
